## NIKSUN Demonstrates New Network Security Enterprise Solutions at RSA Expo

Monmouth Junction, New Jersey, March 26, 2008—NIKSUN, a leader in network security and systems management, is planning to ignite the interest of attendees by demonstrating its latest technological breakthrough, NetOmni™, at the RSA Conference 2008 at the Moscone Center in San Francisco, April 8 - 10. NIKSUN will be exhibiting in Booth #755.

NIKSUN manufactures appliances that empower IT personnel to make fast, accurate decisions that assure network service levels meet organizational performance, compliance and security goals and protect data integrity. NIKSUN NetDetector® is an advanced network security appliance that delivers an integrated and scalable solution for anomaly and intrusion detection. The drill-down forensic analysis is well suited for network security surveillance and lawful interception. NIKSUN NetDetectorLive™ provides content and compliance monitoring, enabling companies to identify and quickly react to issues related to sensitive information flowing in and out of their corporate networks. When confidential information is leaked, companies are exposed to significant risk, financial loss and non-compliance to company and regulatory policies such as HIPAA, GLBA, CA SB 1386, PCI and Sarbanes Oxley.

NetOmni is a major component of NIKSUN's Enterprise Solution, which gives a global view of an enterprise's entire network, enabling performance and security monitoring at a glance. It enables real-time and correlated end-to-end views for converged networks including network and application performance, security, compliance and VoIP. With customized data visualization, NetOmni gives business users an at-a-glance understanding of network metrics that are important to them.

NIKSUN executives will be attending the conference and will be available to speak with the press as well as industry analysts regarding NIKSUN's new Enterprise Solution, technological trends and changes in the marketplace. To schedule a briefing, please contact Ankush Sachdeva (732-821-5000 or [asachdeva@niksun.com](mailto:asachdeva@niksun.com)).

### About NIKSUN, Inc.

NIKSUN, Inc. is the recognized worldwide leader in developing and deploying a complete range of award-winning forensics, compliance, security surveillance and performance management solutions for applications ranging from branch offices to core infrastructure environments. NIKSUN's proactive enterprise scalable solutions deliver unprecedented
